Our specialised trained technicians are available to assist with all of the Traffic Signs NZ Ltd electronics range, plant and equipment.

We have preferred service agents available nationwide from the Far North to Invercargill, looking after over 2000 units.

Please contact our technical products team in the first instance, so they can work through the known issues and help diagnose the problem.

Once we have discussed the immediate issues, we can then advise the best course of action, or if any spare parts are required. This is usually more cost effective than taking it to a 3rd party who have no knowledge of our products.
